Hon. Ken Regan, M.C.  
The House Office Building,  
Washington, D.C.

Dear Mr. Regan,

I have invented a code for messages in the form of a cryptogram that I believe cannot be broken. It has over a million transpositions, making it possible to write that many letters in different keys.

I want to offer to sell it to the government, but I don't know just how to go about it. Can you tell me to whom I should write?

I shall appreciate your help very much.

Sincerely yours,
